Press Release – February 2011

2011 EUCAST Guidelines in the BIOMIC V3 Microbiology System

The 2011 EUCAST (European Committee on Antimicrobial Susceptibility Testing) Clinical Breakpoint tables v 1.3 (January 5, 2011) are updated in the BIOMIC V3 software with new antimicrobial susceptibility testing breakpoints.

BIOMIC V3's digital imaging technology automates the reading, interpretation, and reporting of EUCAST, CLSI and BSAC antibiotic disk diffusion tests, Etests (bioMerieux), 96-well microtiter plates, and commercial identification panels including API[®] (bioMerieux), RapID[™] (Remel), BBL[™] Crystal[™] (BD) and chromogenic agar plates. The addition of a bar code reader coupled with bi-directional LIS/LIMS interface capability further speeds workflow. BIOMIC V3 serves as a primary or secondary AST-ID system for microbiology laboratories of all sizes and setups.

About Giles Scientific Inc:

Giles Scientific (Santa Barbara, California, USA) has served clinical, environmental, pharmaceutical and veterinary microbiology laboratories since 1984. The Company develops, manufactures, sells and supports our customers with our color digital imaging equipment in 63 countries.
