Press Release – April 2013

Automated Disk Code Recognition with BIOMIC V3

The BIOMIC V3 Microbiology System automatically recognizes disk codes from several manufacturers including Oxoid, BD and Bio-Rad. Digital imaging technology locates disk positions, recognizes disk codes, and measures zone diameters. BIOMIC V3 provides S-I-R interpretations and expert rules following CLSI, EUCAST, or BSAC guidelines.

BIOMIC V3 also automates the reading, interpretation, and reporting of Etests[®] (bioMérieux), MIC Test Strips (Liofilchem[®]), 96-well microtiter plates, and ID panels including API[®] (bioMérieux), RapID[™] (Remel), BBL[™] Crystal[™] (BD), Liofilchem[®] ID Systems, colony count and chromogenic agar plates. Bar code entry and a 2-Way LIS/LIMS interface further speeds lab workflow. BIOMIC V3 serves as a primary or secondary AST-ID system for microbiology laboratories of all sizes and setups.

About Giles Scientific Inc:

Giles Scientific has served clinical, environmental, pharmaceutical and veterinary microbiology laboratories since 1984. The Company develops, manufactures, sells and supports our customers in 75 countries.
