

Clinical Microbiology System

Open system to automate and standardize manual microbiology tests

- Instant digital reading & interpretation
- 2-way LIS/LIMS interface
- CLSI, EUCAST, BSAC guidelines
- Resistance monitoring & antibiograms
- 21 inch touch screen

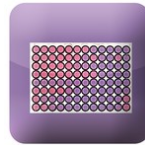

Testing Modules:

Antibiotic Susceptibility

- Disk Diffusion Tests
- Etest[®] & MIC Test Strips

96-Well Microtiter*

- Custom Plates
- Commercial Plates

Organism Identification

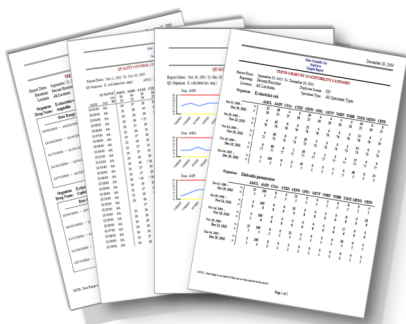

- API[®] panels
- RapID[™] panels
- Crystal[™] panels
- Liofilchem[®] ID Systems

Colony Counting

- Colony Count Plates
- Chromogenic Agar Plates

*96-Well Microtiter - Note in USA: *For Research Use Only. Not for use in diagnostic procedures.*

Quality Control Testing

- AST, ID & reagent QC testing
- QC summary reports
- Documentation of disks, plates, reagents & media
